Appendix 12 - Head injury parental guidance
INTRODUCTION AND GENERAL PRINCIPLES

The staff and trustees of ESPRIT Multi Academy Trust are wholly committed to pursuing a policy of inclusive education that welcomes and supports pupils with medical conditions, allowing them full access to education, including academy trips and physical education. This policy is designed to ensure that adequate first aid provision and medical care, including the management of medication, is in place within our academies to support individual pupils and/or staff members with medical needs.

This policy complies with DfE statutory guidance for “Supporting pupils at school with medical conditions” Statutory Guidance for Governing Bodies (December 2015)

AIMS

To provide a clear policy that is understood and accepted by all staff, parents and children, providing a sound basis for ensuring that children with medical needs receive proper care and support in the academies, and that for such children attendance is as regular as possible. The policy of this Multi Academy Trust is not to administer medication or medical care unless the pupil has a medical condition, which if not managed, could prove detrimental to their health or limit access to education.

The policy includes:

- A clear statement of parental responsibilities in respect of medicines
- Roles and responsibilities of staff administering medicines or first aid
- Identification of areas designated for medical and first aid care
- Procedures for managing prescription medicines which need to be taken in the academy day
- Procedures for managing prescription medicines on outings and trips
- Written permissions from parents for medicines
- Circumstances in which children may take non-prescription medicines
- Assisting children with long term medical needs
- Staff training, including the identification of trained staff
- Record keeping
- Safe storage of medicines
- The academies’ emergency procedures
- Risk assessment and management procedures
- Management of medical conditions

RESPONSIBILITIES

Parent and guardians

- Parents or guardians have prime responsibility for their child’s health and should provide the school with up to date information about their child’s medical conditions, treatment and/or any special care needed.
- If their child has a more complex medical condition, they should work with the school nurse or other health professionals to develop an individual healthcare plan, which will include an agreement on the role of the academies in managing any medical needs and potential emergencies.
- It is the parent/carers responsibility to make sure that their child is well enough to attend school.

Academy Staff
• Any member of staff may be asked to provide support to pupils with medical conditions, including the administering of medicines, although they cannot be required to do so.
• Although administering medicines is not part of teachers’ or support staff professional duties, they should take into account the needs of pupils with medical conditions that they teach/support.
• Academy staff will receive sufficient and suitable training and achieve a necessary level of competency before they take on responsibility to support children with medical conditions.
• Any member of staff will know what to do and respond accordingly when they become aware that a pupil with a medical condition needs help.
• Staff members who conduct medical procedures will be fully covered by the academies’ public liability insurance document in accordance with “Supporting pupils at school with medical conditions.”
• The Executive Principal, Academy Principals and the Board of Trustees will ensure that the policy is developed and effectively implemented with partners, including ensuring staff awareness of the policy and understanding of their roles.
• The Trustees will ensure that school leaders consult health and social care professionals, pupils and parents to ensure that the needs of children with medical conditions are effectively supported.

Lunchtime Staff/Supply

• All Lunchtime and supply staff must familiarise themselves with the information held in the medical file of the class that they are supervising.
• All lunchtime staff must report all incidents or accidents to the class teacher and complete appropriate accident slips.

Multi Academy Board of Trustees

• The Trust has a named Governor for safeguarding.
• Trustees must ensure that the policy and training of staff meets the needs of children.
• Trustees are responsible for ensuring that sufficient staff have received suitable training before taking on the responsibility of looking after children with specific medical conditions.
• Trustees ensure that pupils with medical conditions are supported to enable the fullest participation possible in all aspects of school life.

**Strategy - Identification & Awareness**

• Parents must inform the academy of any medical condition of their child that may be a cause for concern.
• When the academy receives medical confirmation, from a health professional, regarding the condition, then a meeting will be held with parents/carers and the Medical Lead and/or class teacher/key worker to develop the health care plan.
• Medical lists will be updated regularly and displayed in the designated medical area.
• Academy staff must be suitably trained in identifying pupils where a medical condition may be developing.
• Academy staff must report any concerns they have on the medical welfare of any pupil and share this information with all relevant parties, including the information in the medical file stored in each classroom.
Training

- All nominated personnel will undertake training in first aid, administration of medicines and awareness of medical problems in pupils.
- A record of trained personnel is kept centrally.

Administration of Medicines

PRESCRIBED MEDICINES

- Prescribed medicines should only be brought into the academies when essential; that is, where it would be detrimental to a child’s health if the medicine were not administered during the academy day.
- Medicines prescribed ‘three times a day’ should be administered “before the start of the day, at the end of the day and at night”. This academy recognises in extreme cases (as stipulated by a doctor in writing), and agreed by the Academy Principal, that staff may administer medication following completion of a short term Individual Health Care Plan (see Appendix 1), with a supporting letter from the doctor. Without a letter from a doctor, staff will not administer three times a day prescribed medicines. However, parents and carers are all permitted to attend the academy to administer medication if they so desire. Medications prescribed ‘four times a day’ will be administered by academy staff following the completion of a short term Individual Health Care Plan.
- This Multi Academy Trust will only accept medicines that have been prescribed by a doctor, dentist, nurse prescriber or pharmacist prescriber and are presented in the original container dispensed by a pharmacist and include the pupil’s name, prescriber’s instructions for administration and dosage. It is not usual policy to administer prescribed Calpol.

NON-PRESSCRIBED MEDICINES

- Non-prescribed medicines will only be administered with prior written permission from parents in extreme circumstances such as residential trips or day trips, e.g. travel sickness medication.
- Staff will check the medicine has previously been administered without adverse effect and a short term Individual healthcare plan (see Appendix 1) must be completed.
- Staff will never administer medication containing aspirin unless prescribed by a doctor.
- Staff will never administer medication containing ibuprofen to children who are asthmatic.

ADMINISTERING MEDICINES

- This trust recognises that no child under 16 should be given medicines without their parent’s written consent.
- Following written consent using an Individual Healthcare plan, any member of staff administering medicines to a pupil should check:
  - The child’s name
  - Name of medication
  - The prescribed dose
  - Expiry date
  - Written instructions provided by the prescriber on the label or container
  - That administering of medicine is witnessed
- If in doubt about any procedure, staff will not administer the medicine before checking with parents or a health professional before taking further action.
- Where staff are administering prescribed medicines they will follow the flow chart detailed in appendix 2.
• A written record must be kept following administration of medicines to pupils, using the medication record form (see appendix 3)
• If a child refuses to take a medicine, staff will not force them to do so, but will record this and parents/carers will be notified of the refusal.

LONG-TERM MEDICAL NEEDS

• Where a pupil has a chronic illness, medical or potentially life threatening condition, the academy will initiate a long term health care plan (see appendix 4) to meet individual needs and support the pupil using the flow chart to support (see appendix 5).
• This will be drawn up by health care professionals in consultation with the child’s parents or guardians and will contain the following information:
  o Definition and details of the condition
  o Special requirements e.g. dietary needs, pre-activity precautions
  o Treatment and medication
  o What action to take/not to take in an emergency
  o Who to contact in an emergency
  o Staff training where required
  o The role the staff can play
  o Consent and agreement

RECORD KEEPING

• Parents should tell the academy about the medicines their child needs to take and provide details of any changes to the prescription or the support required. Medicines should always be provided in the original container as dispensed by the pharmacist and include the prescriber’s instructions.
• Medication should be signed into the academy by the Medical Lead or Home School Link Worker/Early Intervention Family Support Worker (Appendix 2 – Flowchart) using the Weekly Medication Checklist (Appendix 3)
• Requests for staff to administer medication should be written on Individual Healthcare plans. These should include:
  o Name of child
  o Name of medicine
  o Dose
  o Method of administration
  o Time/frequency of medication
  o Possible side effects
  o Expiry date
• Individual Healthcare Plans MUST BE SIGNED by all staff who will administer medicine. It is the responsibility of the Medical Lead to administer medication. Where the Medical lead is unable to administer medication, they will delegate this responsibility to the Home School Link Worker/Early Intervention Family Support Worker.
• Completed forms should be kept in the class medical folder and referred to when administering medication. ‘Daily Record of Medication Administered’ (Appendix 3) must be completed by staff following administration; this should also be kept in the class medical folder.
• If a child refuses medication, this must be recorded on the medication record sheet and parents will be notified.
• Requests for updated medical conditions including asthma, are distributed to parents at the beginning of each academic year. These are collated by the Medical Lead and registered and recorded in each class medical folder and in the designated first aid room area. All staff have access to this information and actions to take in an emergency.
• Children with food allergies have their photographs and details displayed in the kitchen to be seen by all catering staff to ensure that food products are safe for children. These are also displayed in the staffroom.
• Updated medical conditions and reviews of policies and practice are monitored and disseminated by the Medical Lead in liaison with the Executive Leadership Team as they are presented.

REPORTING

• Parents are to be informed of all accidents especially head injuries (written form sent home and verbal explanation).
• Any serious injuries, particularly those that require hospital attention, are to be recorded on the Local Authority accident report form, which is available from the academy office and sent to the Local Authority within twenty four hours of the accident.

STORING MEDICINES

• Staff will only store, supervise and administer medicine that has been prescribed for an individual child.
• Medicines must be stored safely in the pharmacist’s original container and clearly labelled with the child’s name, the dosage and instructions for administration.
• Non-emergency prescribed medication is stored with the short term Individual Healthcare plan in the designated medical space.
• Medication requiring refrigeration is stored in the designated medical space fridge.
• Emergency medications such as Epi-pens and asthma inhalers should be readily available in a clearly labelled container in the class teacher’s cupboard.
• Children should know where their medicines are stored; they should not be locked away.
• Parents are ultimately responsible for checking expiry dates on their children’s medicines and replacing as necessary. The Medical Lead will also check medication expiry dates half termly.

DISPOSAL OF MEDICINES

• Staff should not dispose of medicines. Parents are responsible for ensuring that date-expired medicines are returned to a pharmacy for safe disposal. They should also collect medicines held at the end of each academic year.
• Any medicines that have not been collected should be taken to a local pharmacy for safe disposal by the medical lead.
• Sharps boxes should always be used for the safe disposal of needles. Parents should obtain these from their child’s GP and return to a pharmacy for safe disposal or arrangements should be made with the school nursing team in the case of failure to collect.

RISK ASSESSMENTS

• Where an individual risk assessment is deemed necessary for a medical need, e.g. following a broken bone where a child has a cast or epileptic fits these will be developed in collaboration with parents and any other external health agencies by the class teacher and year leader/key stage leader where appropriate.
• A standard risk assessment format will be used by all staff (see Appendix 6)
ACCIDENTS AND EMERGENCY PROCEDURES

- All staff are aware of procedures when dealing with a medical emergency. These should be supervised by a trained First Aider.
- Emergency procedure flowchart to be followed for all accidents and injuries (see Appendix 7, 7a and 7b)
- Where a parent is telephoned to make them aware of an accident (non-emergency) this is to be done by classroom staff.
- All staff are aware of pupils with a health care plan and understand the need to follow agreed emergency support.
- All staff know how to call the emergency services; guidance is displayed on the academy office noticeboard and in the staffroom.
- In the event of an emergency, every effort will be made to contact a parent so that they may accompany their child to hospital. If this is not possible, a member of staff will accompany the child to hospital by ambulance and stay until the parent arrives. Health care professionals are responsible for any decisions on medical treatment when parents are not available.

INITIMATE CARE

In the event of an injury/soreness in an area of the body that could be described as intimate, two or more first aiders must be present for the examination/first aid procedure.

EDUCATIONAL VISITS

- This Multi Academy Trust actively encourages children with medical needs to participate in trips and visits.
- Staff will aim to facilitate reasonable adjustments to enable pupils with medical needs to participate fully and safely on visits.
- Risk assessments will be used to highlight any potential difficulties and ensure procedures are in place to support pupils.
- Additional staff/adults will be considered for this purpose.
- Prescribed medication will be administered, providing parents have completed an Individual Healthcare plan.
- Accompanying staff will be aware of any medical needs and relevant emergency procedures.
- A copy of health care plans will be taken on all visits as well as emergency medication that may be required.
- Prior to an overnight academy trip, parents must complete an up-to-date medical questionnaire about pupil’s current general health and medication.
- Prior to an overnight academy trip parents are invited to provide written consent to enable staff to act ‘in loco parentis’ and administer Calpol analgesia or paracetamol (for upper KS2) if required. Where this is refused, parents are requested to discuss alternative support measures with staff.

ABSENCE

- Our Multi Academy Trust has a designated person (Medical Lead) responsible for dealing with pupils who are unable to go to school because of medical needs.
- Parents will let the local authority know if your child will be, or is likely to be, away from school for more than 15 working days.
- Academy staff will supply the person who will help provide education for your child with information about their needs, capabilities and a programme of work.
• Provide support to help them reintegrate into the academy after an illness.
• Ensure that they’re kept informed about academy social events and extra-curricular clubs.
• Encourage them to stay in contact with other pupils – for example, through visits or video diaries/skype chats.

STAFF TRAINING

• The Multi Academy Trust holds training on common medical conditions in line with the advice in ‘Supporting pupils at school with medical conditions’ (December 2015).
• A log of staff training is kept in each academy and reviewed to ensure that training is current and in date.
• Specialist staff training is provided to support the administration of emergency medications such as Epi-pens or insulin if it is identified during the development of an individual healthcare plan that this is needed. Staff will receive support from medical professionals until they are trained to deal with the medical need.
  o Each academy keeps a register of staff who have undertaken the relevant training.
  o Only staff who have received this training should administer such medication.
• Each academy within the trust has several appointed First Aiders and Paediatric First Aiders, a list of which is kept by the academy office and is displayed in the designated medical area in each academy.
• Training is reviewed regularly and updated as necessary.

MEDICAL CONDITIONS

ASTHMA

• The trust recognises that asthma is a widespread, potentially serious, but controllable condition and encourages pupils with asthma to achieve their potential in all aspects of academy life.
• Parents have a duty to inform staff if their child is asthmatic and an asthma care plan (see appendix 4b) will be developed with support from health care professionals.
• Preventative inhalers should be provided and labelled with the pupil and class name.
• These should be kept in an assigned container within the teacher’s cupboard and accompany the child if they are educated outside the academy premises.
• Children with asthma must have immediate access to inhalers when they need them and know where they are kept. A spacer device may be required and the pupil may need support to use this.
• Where a child has exercise induced asthma they will take their reliever inhaler 10 minutes before exercise and then commence with gentle warm up exercises. The trigger of exercise will be recorded on the asthma care plan.
• A record sheet to record the frequency of an inhaler use can be found in each class medical folder. This will be completed for all pupils (see appendix 8).
• Parents should be notified when a child has used an inhaler using the notification letter. (see appendix 9).
• Pupils with asthma are listed in the Asthma Register, found in class medical folders.
• Leaders of ‘extra-curricular clubs’ are notified on club registers if a member is asthmatic by the academy office.
• In ‘severe’ cases (as identified on care plan), inhalers should be in the immediate vicinity of the child at all times e.g. dinner hall, playground, assembly hall.

ESPRIT
Multi Academy Trust
**Emergency Salbutamol Inhaler**

From 1st October 2014 the Human Medicines Regulations 2014 allows schools/academies to keep a salbutamol inhaler for use in emergencies.

The emergency salbutamol inhaler will ONLY be used by children, for whom written parental consent for use of the emergency inhaler has been given and who have either been diagnosed with asthma and prescribed an inhaler, or who have been prescribed an inhaler as reliever medication.

The inhaler will only be used if the pupil’s inhaler is not available, for example, because it is empty or broken.

The inhaler and spacers will be clearly labelled and stored in the Medical area along with:
- Copy of Parental Consent for emergency inhaler (appendix 10)
- Asthma Emergency Note (appendix 9), which will be sent home in the case of use
- Academy Emergency inhaler usage logbook (appendix 11), kept with the inhaler – Staff must record usage
- Staff must also record the usage in the main asthma register located in the child’s base class stating that it is the academy’s emergency inhaler that has been used

**TO AVOID POSSIBLE RISK OF CROSS INFECTION THE PLASTIC SPACER IS NOT TO BE RE-USED AND MUST BE SENT HOME WITH THE CHILD (FOR FUTURE PERSONAL USE)**

**Asthma Lead** is responsible for ensuring that:
- Inhalers are checked half termly, recording this on medical area monitoring
- Replacement inhalers are obtained before the expiry date
- Replacement spacers are re-ordered and replaced after each use
- Overseeing that the emergency inhaler is cleaned
- Empty or out of date Inhalers are disposed of at the local pharmacy

**All Staff responsibilities:**
- The blue plastic inhaler ‘housing’ is cleaned, dried and returned to the designated medical area
- Inform the Medical lead when the spacer is used so that a new one can be ordered
- Completing the School Emergency Inhaler Usage Logbook (appendix 11)
- Staff must also record the usage in the Asthma Register located in the child’s base class, stating that it is the academy’s emergency inhaler that has been used
- Taking an emergency inhaler on academy trips if asthmatic children are attending?

**HEAD INJURIES**

- Pupils who sustain a head injury MUST be reviewed by a First Aider.
- If a pupil has a visible wound, swelling or adverse reaction, parents will be informed and are welcome to assess their child personally.
- Where there are no residual effects, the pupil can remain in the academy whilst being observed by all supervising/responsible staff
- A head injury advice sheet must be completed and sent home with the routine accident record slip (see appendix 12).
EPILEPSY, ANAPHYLAXIS AND DIABETES

- Parents have a duty and responsibility to notify the academy if their child has any of these conditions and should provide details of any treatment and support they may require during the academy day.
- Relevant health care professionals will liaise between parents/guardians and school personnel to ensure staff are aware of, and trained to provide, any relevant or emergency support or treatment.
- An individual health care plan will usually be compiled, detailing the course of action to be taken (see Appendix 4a – Epilepsy).

ALLERGIES (FOOD AND OTHER)

- Parents have a duty and responsibility to notify the academy if their child has any allergies and share medical documentation regarding any diagnosis and/or treatment.
- Information will be shared with all staff within the academy to ensure that the child does not come into contact with any triggers.
- An individual health care plan will usually be compiled in any case where medication would be required.
APPENDIX 1

Short term Individual Healthcare Plan

Name: _______________________________ Date of birth: _______________________________

Academy: ___________________________ Academy Principal: __________________________

Parental contact number: ________________________________

Medical condition: ________________________________

Health Care plan completed by Medical Lead prior to first dose of medication. *Where the Medical Lead is not available the Class Teacher and/or Class Support Staff can complete the plan. A copy of this is sent to SLT for information only.*

Medical Lead to inform Class based staff about a plan and gain signatures.

Medical Lead to submit Health Care plan to SLT for information, to be added to Class Medical file and central file.

Medication stored securely in the designated medical area and is “signed in” on the record sheet. **Medication to be handed to Medical Lead or HSLW/EIFSW**

Medication administered at identified time by Medical lead/deputy in the presence of a witness. Record sheet completed.

Medicine collected from the designated medical area at the end of the day, signed out and returned to parents by Medical lead or HSLW/EIFSW.

Asthma Care Plan and Medication: Consent

If your child has been diagnosed with asthma and has been prescribed reliever therapy (Blue inhaler) please complete the first part of this form which gives your consent for academy staff to give this if required.

I hereby give my consent for academy staff to give my child reliever therapy for the treatment of an asthma attack/prior to PE if required. I understand that I will be informed when treatment has been given other than for routine treatment by my request.

Name of child: .................................................................

Date of birth: .................................................................

Academy: ............................................................................

Name of Inhaler: ......................... Number of Puffs: ........

Signed Parent/Guardian_______________________Date_________

If your child has an asthma attack the academies’ emergency procedure will followed.

A copy of your child’s academy asthma care plan will be sent to you.

Please ensure that your child has a SPARE reliever inhaler and spacer kept in the academy and that your child’s inhaler is within its expiry date.

If your child experiences breathing problems, especially at night or after exercise, or when laughing or crying, or he/she suffers from repeated chest infections please contact your School Nurse
APPENDIX 5

Flow chart for developing Individual Healthcare plans

Parent or healthcare professional informs the academy that a child has been newly diagnosed or is due to return to academy after a long term absence, or that needs to be changed.

↓

Medical Lead co-ordinates meeting to discuss child’s medical support needs; and identifies member of academy staff who will provide support to pupil

↓

Meeting to discuss and agree on need for IHCP to include key academy staff, child, parent, relevant healthcare professionals and other medical/health clinicians as appropriate (or to consider written evidence provided by them)

↓

Develop IHCP in partnership – agree who leads on writing it with input from healthcare professionals.

↓

Academy staff training needs identified

↓

Healthcare professional commissions/delivers training and staff signed off as competent – review date agreed

↓

IHCP implemented and circulated to all relevant staff

↓

IHCP reviewed annually or when condition changes.

APPENDIX 7

Emergency procedure flowchart

Cut or graze

- Cut to be cleaned with a wipe and a plaster applied

- Date and child’s name to be completed on accident slip and signed by staff. Record of first aid to be made in the first aid notebook. (Individual notebooks held by lunchtime supervisors)

Bump (to body part other than the head)

- First aid completed as appropriate, e.g. ice pack

- Date and child’s name along with the location of the bump to be completed on accident slip and signed by staff. Record of first aid to be made in the first aid notebook. (Individual notebooks held by lunchtime supervisors)

Trapped body part

- First aid completed as appropriate, e.g. ice pack

- Date and child’s name to be completed on accident slip and signed by staff. Record of first aid to be made in the first aid notebook. (Individual notebooks held by lunchtime supervisors)
APPENDIX 7a

Head injury

- Ice pack and appropriate first aid completed
- Duplicated accident slip completed and signed
- Advice sought from first aider at work or paediatric first aider if necessary

A cut with excessive bleeding

- First aid treatment given to stop bleeding and treat cut
- Duplicated accident slip completed and signed
- Advice sought from first aider at work or paediatric first aider if necessary

A suspected broken bone

- First aid treatment given
- Duplicated accident slip completed and signed
- Advice sought from first aider at work or paediatric first aider if necessary

Advice sought from first aider at work or paediatric first aider if necessary

Parents or carers will be contacted to inform them of accident and advise them to collect the child and take them for medical treatment.

*NB if parents cannot be contacted the child will be taken to hospital by a staff member

An ambulance will be called and parents or carers will be contacted to inform them of accident.

*NB if parents cannot be contacted the child will be accompanied to hospital by a staff member

An accident/near miss form should be completed by staff members if the child is taken for or advised to go for further medical treatment.
APPENDIX 7b

Asthma attack

In normal class circumstances – the child should be given their normal treatment (as per the medical care plan)

At lunchtime or break times the child will be sent with a friend carrying an orange “I need my inhaler card” into school to the staffroom

Parents should be informed at the end of the day

If the attack is severe an ambulance should be called and parents should be contacted immediately.

Date

Dear parent/guardian of: ..........................................

Your child has had problems with his/her breathing today which has required the use of their own inhaler/academies’ emergency inhaler. (delete as appropriate)

Since this may indicate your child’s asthma is not well controlled at this time you are strongly advised to see your own doctor or practice nurse as soon as possible. If your child needs to use their reliever medication 3 times a week or more, seek a medical review.

<td></td>
<td></td>
</tr>
</tbody>
</table>

Yours sincerely

If your child needed to use the school emergency inhaler would you please ensure they have their own labelled inhaler and spacer in the academy.

If your child is needing to use their reliever inhaler more than 4 hourly please seek an urgent medical review.

APPENDIX 10 - EMERGENCY INHALER CONSENT
Use of emergency Salbutamol inhaler at

__________________________

Child showing symptoms of asthma / having asthma attack

1. I can confirm that my child has been diagnosed with asthma / has been prescribed an inhaler [delete as appropriate].

2. My child has a working, in-date inhaler, clearly labelled with their name, which they will bring with them to academy every day.

3. In the event of my child displaying symptoms of asthma, and if their inhaler is not available or is unusable, **I consent** for my child to receive salbutamol from an emergency inhaler held by the academy for such emergencies.

Child’s name: ........................................................................................................................................

Class: ........................................................................................................................................

Head injury observation instructions for parents and guardians

Following a head injury, you should keep your child under adult supervision for the next 24 hours. If any concern arises that he/she is developing a problem, please seek advice from your GP or the Emergency Department.

The signs that you should look out for are:

- If your child becomes unusually sleepy or is hard to wake up
- Headache all the time, despite painkillers.
- Repeated vomiting
- Weakness of arms or legs, e.g. unable to hold things
- Difficulty in seeing, walking, or acts clumsy and uncoordinated.
- Confusion (not knowing where he/she is, getting things muddled up).
- Fluid or blood coming from ear or nose.
- Fits (convulsions or seizures)
- Any other abnormal behaviour.

Your child should be allowed to sleep as normal. We would encourage you to arrange to observe him/her on a couple of occasions overnight to check:

- Does he/she appear to be breathing normally?
- Is he/she sleeping in a normal posture?
- Does he/she make the expected response when you rouse him/her gently? (e.g. pulling up sheets, cuddling teddy-bear)
- If you cannot satisfy yourself that your child is sleeping normally, he/she should be wakened fully to be checked.

If you are concerned about any of the above or have any other worries please contact UHNS Emergency Department
